EDUCATION

Northeastern University, Boston, MA
Master of Science in Computer Science

Aug 2019 - Dec 2021

University of Mumbai, Mumbai, India
Bachelor of Engineering in Computer Engineering

Aug 2015 - May 2019

TECHNICAL KNOWLEDGE

Languages: Python, Java, C++, JavaScript, C#
Web / Frameworks: Spring Boot, JPA, Node.js, React.js, GraphQL, .NET, .NET Core, Entity Framework
Databases: MongoDB, SQL Server, MySQL
Tools: Git, Heroku, AWS, Azure DevOps

WORK EXPERIENCE

Salesforce, Bellevue, WA

Jan 2022 - Present

MTS Software Engineer, Authentication Core

- Contributed to engineering and end-to-end testing for core authentication features related to user and session management using Java
- Eliminated critical authentication regressions for Salesforce's Lightning Experience by hardening logout logic to resolve non-deterministic logout failures and fixing login hint injection logic to ensure UI rendering of hints for Lightning enabled orgs
- Optimized the Salesforce's SCIM 2.0 implementation for automated user provisioning and addressed existing bugs with the PATCH operation
- Architected telemetry dashboards to analyse UI authentication traffic across login.salesforce.com (production) and test.salesforce.com (sandbox), performed time-series analysis on request density and regional success rates to identify anomalies and facilitate data-driven decisions
- Served as SME for Authentication Core's service health monitoring, spearheaded the modernization of FIT/Kaiju testing frameworks and vulnerability remediation to ensure platform resilience for our services across all Salesforce instances
- Orchestrated technical debt reduction by leading initiatives to remove unused legacy features and org permissions to improve code maintainability and reduce build complexity
- Implemented WCAG compliant focus management and dynamic text resizing to ensure accessibility on mobile and web interfaces for login features
- Authored onboarding guides to support team's migration from Perforce to Git (source control system) and from Maven to Bazel (build system)

Comcast, Chicago, IL

May 2021 - Aug 2021

Information Technology Intern, Application Development

- Collaborated with a team of 3 to create an application that tracks the recovery of \$1.3 million worth of company equipment per quarter and reduces the man-hours associated with the process by 100 hrs annually
- Created backend API's using C# and .NET MVC and used Javascript, AJAX and jQuery for frontend interface
- Designed and implemented anonymous feedback feature for Comcast's Sponsored Services Vouchers application using C#, .NET Core and Javascript

Cogitate Technology Solutions, Atlanta, GA

Feb 2021 - May 2021

Software Engineering Intern

- Worked on Low Code/No Code configuration tool for Cogitate's DigitalEdge Insurance Platform
- Implemented backend REST API using C# and .NET 5 and created frontend interfaces for them using React.js
- Migrated API's from .NET Core 3.1 to .NET 5 and resolved any issues arising from change in frameworks

Northeastern University, Boston, MA

Sep 2020 - Dec 2020

Graduate Teaching Assistant, Theory of Computation

- Evaluated assignments, resolved queries and assisted professor with classroom instruction for upto 50 students

Comcast, Atlanta, GA

May 2020 - Aug 2020

Information Technology Intern, Application Development

- Streamlined user's workflow by implementing Single Sign-On user authentication for .NET applications
- Improved the run-time performance by 20%, investigated and resolved issues for an existing .NET application
